RE: 1997 Biennial Hazardous Waste Report for  
AKD000850701 MAPCO NORTH POLE REFINERY

Dear Hazardous Waste Coordinator:

Enclosed is your copy of the 1997 Hazardous Waste Report, Instructions and Forms (Biennial Report). Recently you informed us that your facility either operated as a large quantity generator (LQG) of RCRA hazardous waste or as a treatment, storage or disposal facility (TSD) in 1997. As such, you are required to file a biennial report for this facility per §3002 and §3004 of the Resource Conservation and Recovery Act and Title 40 Code of Federal Regulations Parts 262.41, 264.75 and 265.75.

Last month we sent out inquiries to all Alaska facilities designated as RCRA regulated facilities. In response you sent us the enclosed Information and Certification Form (IC). Initial and re-date this IC Form (with any changes or additions) and return it with all other applicable Generation and Management (GM) and Waste Received (WR) forms on or before March 1, 1998, to:

U.S. Environmental Protection Agency Region 10  
1200 Sixth Ave. WCM-122  
Seattle, WA 98101

Remember to keep a copy for your records.

AK 0701  
4A  
12/30/97

FILE COPY

Please note that the 1997 reporting requirements for Alaska filers have been significantly reduced.

Small Quantity Generators (SQG) are not required to file  
AND  
you are not required to report off-year (1996) activities  
AND  
the Off-Site Identification Form (OI) is not required.

If you are responsible for several sites or that many GM or WR forms will be required for your submission, we would like you to consider filing in electronic format. Please contact us if you would like more information on this.

To obtain assistance in filling out these forms, please call the EPA Hotline at 1-800-424-9346. You may call the EPA Region 10 RCRA Hotline at 1-800-550-7272 or 1-206-553-0758 for filing date extensions or for guidance on electronic filing.

Sincerely,

*Jr. Nina Kocousk*
